Annual civil legal assistance report

January 1–December 31, 2025 • Invented Housing Stability Grant • Synthetic demonstration edition

A fictional report calculated from synthetic records

The organization, grant, clients and cases are invented. Every figure below was calculated from the accompanying synthetic 2025 data extract using the definitions on page 8. These are demonstration definitions, not approved Clinic or funder rules.

Reporting population	Number
Unique clients with a qualifying closed case	1,221
Qualifying closed civil cases	1,805
Legal-problem groups / detailed categories	10 / 73

What the figures count

A qualifying case was accepted for representation, assigned to the fictional Housing Stability Grant at closure, has one individual primary client, and was closed between January 1 and December 31, 2025, inclusive, as recorded by the January 31, 2026 freeze. Cases opened earlier qualify if closed in 2025. Cases still open at the freeze, intake-only contacts, duplicate matters, non-civil matters, organizational clients and matters closed under another funding source are excluded.

The client tables count each primary client once across all qualifying cases. The closure matrix counts each qualifying case once. One client may have several distinct legal matters, so 1,805 cases can exceed 1,221 unique clients. Co-clients and household members are not added to this example's population.

Report guide

Page 2: client race / ethnicity by age and gender.
Pages 3–7: one continuing legal-problem × closure-outcome matrix.
Page 8: category, missing-value and outcome-assignment definitions.

Client profile

January 1–December 31, 2025 • Same population in Tables 1 and 2: 1,221 unique clients

01 Race / ethnicity by age

Client profile	Under 18	18–59	60 and Over	Age unknown	Total
Hispanic / Latino, any race	17	307	100	13	**437**
Black / African American, non-Hispanic	7	76	26	2	**111**
White, non-Hispanic	23	283	103	3	**412**
Asian, non-Hispanic	0	31	10	1	**42**
Native Hawaiian / Pacific Islander, non-Hispanic	0	10	4	1	**15**
American Indian / Alaska Native, non-Hispanic	2	57	18	3	**80**
Multiple races, non-Hispanic	2	51	13	0	**66**
Another self-described race, non-Hispanic	2	14	3	1	**20**
Race / ethnicity not reported	2	22	4	0	**28**
Race / ethnicity unknown or unusable	0	4	6	0	**10**
Total	**55**	**855**	**287**	**24**	**1,221**

Age is measured on December 31, 2025. Unknown age remains in the population as a separate column. Race / ethnicity is one mutually exclusive reporting assignment per client; see page 8.

02 Gender

Gender	Women	Men	Nonbinary	Another self-description	Not reported	Unknown / unusable	Total
Number of Clients	700	447	38	6	23	7	**1,221**

Self-described gender; transgender women and men are included in Women and Men. Gender identity is not a separate overlapping count. Not reported and unknown / unusable remain explicit. All zeros shown in this report are genuine zero counts in the synthetic data, never missing information.

03 Legal problems × case closure outcomes

Table 3 • One logical matrix • Part 1 of 5 • Closed cases; each case appears once

Legal problem / closure outcome	Counsel / advice	Limited action	Settlement without litigation	Settlement with litigation	Administrative agency decision	Court decision: uncontested	Court decision: contested	Court decision: appeals	Other	Extensive service	Total
Consumer & finance											
01.01 Debt collection defense	21	6	2	6	0	4	4	0	0	1	**44**

Grand total sums detail rows once; subtotals are summaries, not additional cases.

Reporting definitions

January 1–December 31, 2025 • Demonstration choices supporting all three logical tables

Dates, freeze and unique units

The reporting interval uses local calendar dates in America/Denver. The fictional source snapshot is frozen on January 31, 2026: only case events and demographic responses recorded on or before that date are used. The 2025 extract was pulled on February 15, 2026, so it also contains a few records recorded after the freeze; those are ignored. Count each distinct case ID once, using its final state as of the freeze; a case reopened before the freeze and still open then is excluded, while one reopened after the freeze still counts. Distinct primary client IDs across qualifying cases define both demographic tables. Eligibility follows grant assignment at closure, not opening date or number of services.

Demographic assignment and missing information

Use the latest demographic response effective on or before December 31, 2025 and recorded by the freeze. Age is completed years on December 31, 2025; missing, conflicting, future or otherwise invalid birth dates become Age unknown. Hispanic / Latino identity takes precedence regardless of race. Otherwise, confirmed non-Hispanic clients enter one race category; multiple selected races enter Multiple races. Declined / unanswered race or ethnicity enters Not reported; conflicting or unusable responses enter Unknown or unusable. Neither is inferred from names or geography. Gender uses one self-described category; declined / unanswered and unusable responses are distinguished.

One primary problem and one closure outcome

Assign each case to its primary legal problem at closure; ancillary issues do not create extra rows. Every displayed category is available even when its count is zero. All qualifying synthetic cases have known primary problem and outcome assignments. Missing assignments in future data must be resolved or shown in an explicit unknown category, never recoded as Other or zero. Category 10.05 serves organizational clients only and is therefore zero in this individual-client report.

Exclusive closure hierarchy

Choose the first applicable terminal outcome: final appellate court decision; contested trial-court decision; uncontested trial-court decision; administrative agency decision; negotiated settlement with a filed court action; negotiated settlement without a filed court action. A consent order solely implementing a negotiated agreement remains a settlement. An appeal filed without a decision does not qualify as an appellate decision. Administrative proceedings alone do not count as court litigation.

Service-based outcomes and Other

If no terminal outcome applies, use Extensive service for more than five recorded substantive service hours; otherwise Limited action for a discrete intervention beyond advice, then Counsel / advice for advice alone. Other is a known closure meeting none of those definitions, such as withdrawal before substantive service. Apply this order once per case. The five-hour cutoff is invented for this demonstration.

Interpretation and reuse

This report was calculated from the synthetic 2025 extract and reconciles exactly to it. Companion 2024 and 2026 extracts share the same IDs and are supplied as practice data only; no report is produced for those years. Zero means no qualifying synthetic cases or clients in that cell. No suppression is applied because the observations are fictional. This PDF does not validate application calculations, live-model interpretation, native Windows operation or MVP completion.
